How does a Coravin work?

The Coravin™ Model Eight Wine System is the first and only tool that lets you access, pour and enjoy wine from a bottle - without pulling the cork. By inserting the hollow needle through the cork and pressurizing the bottle with argon gas, any amount of wine can be poured.

What is a Coravin Wine Preservation System

The Coravin Wine Preservation System allows you to pour wine from a bottle without removing the cork. Whether you want a sip, a glass, or more, your last glass will always taste just as amazing as your first – even weeks, months, or years later. Coravin has also developed a Screw Cap accessory that enables wine lovers to enjoy and preserve bottles sealed with a screw cap for up to three months.

How long does the wine last?

When the Coravin System is used correctly, the wine in the bottle continues to evolve in the same way as if Coravin was never used.
